

TECASINT 2391 black - halvfabrikat

Kemisk beteckning

PI (polyimid)

Färg

Svart

Densitet

1.53 g/cm³

Fillers

15% molybdendisulfid (MoS₂)

Huvud egenskaper

- hög termisk och mekanisk kapacitet
- mycket bra glid- och slitegenskaper
- mycket god termisk stabilitet
- bra kemisk resistans
- högt krypmotstånd
- motstånd mot hög energi strålning
- känslig för hydrolysk i högre termiska intervall

Målindustrier

- flygplan och rymdknik
- kryogenteknik
- precisions teknik
- vakuumpernik

| Brandklassning (UL94) | corresponding to | V0 | | DIN IEC 60695-11-10; | 1) |

→ TECASINT 2000 series show significant water uptake. Parts have to be pre-dried before fast heating to above 200 °C (drying process: 2 h per 3 mm wall thickness at 150 °C).

Our information and statements reflect the current state of our knowledge and shall inform about our products and their applications. They do not assure or guarantee chemical resistance, quality of products and their merchantability in a legally binding way. Our products are not defined for use in medical or dental implants. Existing commercial patents have to be observed. The corresponding values and information are no minimum or maximum values, but guideline values that can be used primarily for comparison purposes for material selection. These values are within the normal tolerance range of product properties and do not represent guaranteed property values. Therefore they shall not be used for specification purposes. Unless otherwise noted, these values were determined by tests at reference dimensions and machined specimen. As the properties depend on the dimensions of the semi-finished products and the orientation in the component (esp. in reinforced grades), the material may not be used without a separate testing under individual circumstances. The customer is solely responsible for the quality and suitability of products for the application and has to test usage and processing prior to use.
