TECACOMP PPS CF30 TF15 black 1061041 - Compounds

Chemical Designation
PPS (Polyphenylensulfide)

Colour
black

Density
1.52 g/cm^3

Fillers
carbon fibres, PTFE

Main features
- good slide and wear properties
- very good chemical resistance
- high dimensional stability
- very high stiffness
- high creep resistance
- high heat deflection temperature
- inherent flame retardant

Mechanical properties	parameter	value	unit	norm	comment
Tensile strength		160	MPa	DIN EN ISO 527-1	
Modulus of elasticity (tensile test)		28400	MPa	DIN EN ISO 527-1

- This material can be processed as a thermoplastic taking the normal technical provisions into account. The above mentioned information refers exclusively to the injection moulding process.
- Processing should be carried out as gently as possible, in order to maintain the maximum fibre length in the component. Back pressure and injection rate should be adjusted to the component geometry accordingly. The optimum processing temperature depends upon the respective geometry of the moulded part and can be different from machine to machine.

Permissible residual moisture content		< 0,05	%	-	
Drying temperature		140 - 150	°C	-	
Drying time		2 - 4	h	-	

- To achieve optimum mechanical properties, it is recommended to pre-dry the material with the above mentioned parameters.
- Information on storage and shelf life: The granules must be stored in dry, normally tempered rooms and in closed containers. For moisture-sensitive materials, the granules must be sealed airtight. Protection against direct sunlight must be guaranteed. The granules are usually subject to the requirements of no shelf life limitation. Shelf Life may be limited by some additives.
