TECACOMP PEEK LDS grey 1061958 - Compounds

Chemical Designation
PEEK (Polyetheretherketone)

Colour
grey

Density
1.65 g/cm^3

Fillers
mineral filler

Main features
- developed for the LPKF-LDS® process
- high adhesive strength
- very good chemical resistance
- inherent flame retardant
- good heat deflection temperature
- low moisture absorption

Target Industries
- electrical engineering
- mechanical engineering
- medical technology
- automotive industry

processing temperatures		360 - 410	°C	-		
Mould temperature		170 - 210	°C	-		

- This material can be processed as a thermoplastic taking the normal technical provisions into account. The above mentioned information refers exclusively to the injection moulding process.
- Back pressure and injection rate should be adjusted to the component geometry accordingly. The optimum processing temperature depends upon the respective geometry of the moulded part and can be different from machine to machine.

Permissible residual moisture content		< 0,02	%	-	
Drying temperature		160	°C	-	
Drying time		4	h	-	

- To achieve optimum mechanical properties, it is recommended to pre-dry the material with the above mentioned parameters.
- Information on storage and shelf life: The granules must be stored in dry, normally tempered rooms and in closed containers. For moisture-sensitive materials, the granules must be sealed airtight. Protection against direct sunlight must be guaranteed. The granules are usually subject to the requirements of no shelf life limitation. Shelf Life may be limited by some additives.
